GitHub

Professional Summary

Results-driven **QA Automation Engineer / SDET** with 3 years of experience in Automation and Manual Testing across Banking and Financial Services domains. Skilled in Selenium WebDriver, Playwright, Java, API Testing, SQL, ETL Validation, and Automation Framework Development using Page Object Model (POM). Experienced in Functional, Regression, Integration, Backend, API, and Cross-Browser Testing. Hands-on experience with Jenkins, GitHub Actions, CI/CD pipelines, Agile methodologies, and end-to-end software quality assurance.

Technical Skills

Languages: Java, Python, SQL

Automation Tools: Selenium WebDriver, Playwright, TestNG, JUnit, Cucumber BDD

Frameworks: Hybrid Framework, Data Driven Framework, Page Object Model (POM)

API & Backend Testing: REST APIs, Postman, Playwright API, SQL, MySQL, JSON, XML, ETL Validation

CI/CD & Tools: Jenkins, GitHub Actions, Git, BrowserStack

Test Management: JIRA, TestRail, QMetry, Confluence

Testing Expertise: Automation Testing, Functional Testing, Regression Testing, Integration Testing, API Testing, ETL Testing, Backend Testing, Data Validation, Cross-Browser Testing

Methodologies: Agile, Scrum

Professional Experience

LTIMindtree

Sep 2023 – Present

Quality Analyst

- Designed, executed, and maintained 300+ manual and automated test cases for UI, API, ETL, and backend validation workflows.
- Developed and maintained scalable hybrid automation frameworks using Selenium WebDriver, Playwright, Java, TestNG, and POM.
- Automated 80+ regression test scenarios, reducing manual regression effort by 30%.
- Performed Functional, Regression, Integration, System, and End-to-End Testing across enterprise banking applications.
- Validated REST APIs and backend services using Postman, Playwright API, SQL queries, JSON, and XML payload validation.
- Conducted ETL testing and source-to-target data validation to ensure data integrity and transformation accuracy.
- Executed cross-browser testing across Chrome, Firefox, and Edge.
- Integrated automation test suites with Jenkins and GitHub Actions for CI/CD execution.
- Improved automation coverage by 25% through identification and automation of high-risk business workflows.
- Performed Root Cause Analysis (RCA) and collaborated with development teams to resolve defects efficiently.
- Managed defects using JIRA and participated in Agile ceremonies and release sign-offs.

Projects

Credit Reference Bureau Integration – ABSA Bank

- Validated loan processing and Credit Reference Bureau (CRB) integration workflows across banking systems.
- Performed backend data validation using SQL queries to verify credit score calculations and eligibility criteria.
- Executed End-to-End testing of customer credit workflows.
- Supported SIT, UAT, Regression, and Integration Testing during production releases.

National Identification Authorization Service

- Tested KYC, customer onboarding, identity verification, and fraud detection workflows.
- Performed API testing using Postman and Playwright API.
- Validated data consistency between UI applications, APIs, and backend databases.
- Executed Functional, Regression, and Integration Testing for critical verification modules.

Customer Management System

- Tested end-to-end customer onboarding, profile management, and case management workflows.
- Performed ETL testing and source-to-target data validation across multiple databases.
- Executed UI, API, Backend, and Database Testing ensuring data accuracy and system stability.
- Collaborated with business stakeholders to identify high-risk scenarios and improve test coverage.

GitHub Projects

Playwright Automation Framework

github.com/typicalengineer008/playwright

- Developed a Playwright-based automation framework using JavaScript and Page Object Model (POM).
- Automated login, job search, and data extraction workflows.
- Implemented reusable page objects and test data management.
- Integrated framework with GitHub for version control and collaboration.

Key Achievements

- Reduced regression cycle time by 30% through automation of critical workflows using Selenium and Playwright.
- Improved test coverage by 25% by identifying and automating high-priority business scenarios.
- Built scalable hybrid automation frameworks supporting UI and API testing.
- Enhanced release quality through strong automation and backend validation practices.

Education

Veer Surendra Sai University of Technology M.Tech	2020 – 2022
Government College of Engineering, Kalahandi B.Tech	2015 – 2019

Certifications

- Software Testing with Java – PentagonSpace
- Postman API Testing – Udemy
- MySQL – HackerRank
- Python – Udemy
