Professional Summary

Results-driven **QA Automation Engineer / SDET** with 3 years of experience in Automation and Manual Testing across Banking and Financial Services domains. Experienced in Banking Application Testing, Loans & Cards Onboarding, Loan Origination System (LOS) workflows, CASA onboarding, backend validation, API Testing, SQL, and enterprise banking applications., customer onboarding, lending workflows, backend validation, API Testing, SQL, ETL Validation, and enterprise banking applications. Skilled in Selenium WebDriver, Playwright, Java, Postman, SQL, Automation Framework Development using Page Object Model (POM), and CI/CD pipelines. Hands-on experience in Functional, System, Integration, Regression, SIT, UAT, API, Backend, and Cross-Browser Testing.

Technical Skills

Languages: Java, Python, SQL

Automation Tools: Selenium WebDriver, Playwright, TestNG, JUnit, Cucumber BDD

Frameworks: Hybrid Framework, Data Driven Framework, Page Object Model (POM)

API & Backend Testing: REST APIs, Postman, Playwright API, SQL, MySQL, JSON, XML, ETL Validation

CI/CD & Tools: Jenkins, GitHub Actions, Git, BrowserStack

Test Management: JIRA, TestRail, QMetry, Confluence

Testing Expertise: Functional Testing, System Testing, Regression Testing, Integration Testing, API Testing, Backend Testing, ETL Testing, SQL Validation, Data Validation, Banking Application Testing, Customer Onboarding, Loans & Cards Onboarding, SIT, UAT, Cross-Browser Testing

Methodologies: Agile, Scrum

Professional Experience

LTIMindtree

Sep 2023 – Present

Quality Analyst

- Designed, executed, and maintained 300+ manual and automated test cases for Banking, UI, API, ETL, and backend validation workflows.
- Developed and maintained scalable Hybrid Automation Frameworks using Selenium WebDriver, Playwright, Java, TestNG, and Page Object Model (POM).
- Automated 80+ regression scenarios reducing manual regression effort by 30%.
- Performed Functional, System, Integration, Regression, SIT, UAT, and End-to-End Testing across enterprise banking applications.
- Validated REST APIs and backend services using Postman, Playwright API, SQL queries, JSON, and XML payload validation.
- Executed SQL-based backend validation to verify customer, loan, and transaction data.
- Conducted ETL testing and source-to-target data validation ensuring data integrity.
- Executed cross-browser testing across Chrome, Firefox, and Edge.
- Integrated automation test suites with Jenkins and GitHub Actions for CI/CD execution.
- Improved automation coverage by 25% through automation of high-risk banking workflows.
- Performed Root Cause Analysis (RCA), defect tracking using JIRA, and collaborated with developers during release cycles.

Projects

Loans & Cards Onboarding – ABSA Bank

- Performed Functional, System, Integration, SIT, UAT, Regression, and End-to-End Testing for Loans & Cards Onboarding applications.
- Validated end-to-end customer onboarding workflows including KYC verification, customer profile creation, loan eligibility, loan application processing, approval, account creation, and loan disbursement.
- Tested card onboarding workflows and validated integrations with Credit Reference Bureau (CRB), National Identification Service, Core Banking applications, and backend services using SQL and Postman APIs.
- Executed backend data validation using SQL, performed API testing using Postman and Playwright API, and ensured data consistency across UI, APIs, and databases.
- Created and executed test scenarios, managed defects in JIRA, collaborated with Business Analysts and Developers, and supported SIT, UAT, Regression Testing, and production releases.

National Identification Authorization Service

- Tested customer identity verification, KYC validation, and fraud prevention workflows for banking applications.
- Performed API testing using Postman and Playwright API.
- Validated backend data consistency between UI, APIs, middleware, and database systems using SQL.
- Executed Functional, Regression, Integration, and System Testing for customer verification modules.

Customer Management System

- Tested end-to-end customer onboarding, profile management, complaint management, and case management workflows.
- Performed ETL testing and source-to-target data validation across multiple databases.
- Executed UI, API, Backend, Database, Functional, and Regression Testing ensuring data accuracy and business process validation.
- Collaborated with business stakeholders to identify high-risk scenarios and improve test coverage.

GitHub Projects

Playwright Automation Framework

github.com/typicalengineer008/playwright

- Developed a Playwright-based automation framework using JavaScript and Page Object Model (POM).
- Automated login, job search, and data extraction workflows.
- Implemented reusable page objects, fixtures, and test data management.
- Integrated framework with GitHub for version control and collaboration.

Key Achievements

- Reduced regression cycle time by 30% through automation of critical banking workflows.
- Improved automation coverage by 25% through automation of high-priority business scenarios.
- Built scalable Hybrid Automation Frameworks supporting UI, API, Backend, and Database Testing.
- Enhanced release quality through automation, SQL validation, API testing, and backend verification.

Education

Veer Surendra Sai University of Technology

2020 – 2022

M.Tech

Government College of Engineering, Kalahandi

2015 – 2019

B.Tech

Certifications

- Software Testing with Java – PentagonSpace
- Postman API Testing – Udemy
- MySQL – HackerRank
- Python – Udemy
